

Pradyumna Kumar

Frontend Developer

✉ pradyumnas526@gmail.com ☎ 7355301953 📍 Prayagraj Uttarpradesh

SUMMARY

Full Stack Developer with strong expertise in React.js ,Backend and growing experience in React Native for cross-platform mobile development ,Redux, GSAP and specializing in building high-performance, interactive web applications. Passionate about crafting seamless user experiences through responsive design and animations.

WORK EXPERIENCE

Web developer Intern

2023/02 – 2023/07

Silfra technologies

Worked on internal web development projects, strengthening practical skills in both frontend and backend fundamentals.

Java Developer Intern

2022/07 – 2022/08

Pie Infocomm pvt ltd

Developed "Online book store " application during java internship . Gained hands on experience in java programming OOps design and project deployment

TECHNICAL SKILLS

Java

OOps, DSA

Backend and Database

- Node.js, Express.js, MongoDB, MySQL, DBMS ,RESTful API Development

Performance Optimization:

Cross-browser compatibility, Code Splitting, Lazy Loading

Version control & tools

- Git, GitHub, Netlify, Vercel

Frontend

- HTML5, CSS3, JavaScript (ES6+), React.js, Redux,Nextjs
- Tailwind CSS, GSAP, Locomotive.js, Bootstrap
- Responsive & Mobile-first Design

Tools & Platforms

Cursor IDE , Bubble.io

PROJECTS

Quick Commerce App (blinkit clone)

- Developed a full-stack quick-commerce application using Node.js, Express.js, MongoDB, and EJS
- Implemented secure authentication with Google OAuth 2.0 and JWT-based session management
- Built dynamic product catalog with image uploads, shopping cart, and order management system
- Integrated Razorpay payment gateway with cryptographic signature verification for secure transactions
- Designed real-time order tracking system with interactive map-based delivery status monitoring
- Developed admin dashboard for inventory management, analytics, and role-based access control (RBAC)
- Optimized data handling using MongoDB aggregation pipelines and Joi-based input validation
- Applied security best practices including bcrypt password hashing, middleware protection, and error handling

Responsive website clone with GSAP & Three.js Inspired by Apple Iphone 15 website

- Recreated Apple's iPhone 15 Pro website with high-quality animations and 3D effects.
- Used GSAP for smooth transitions and Three.js for animated 3D models.
- Configured Sentry for performance monitoring and debugging, improving site performance by 20%.

SCSDB

- Built a sleek movie browsing platform using **React**, **Redux**, **React Router**, and **Infinite Scroll** for smooth, dynamic exploration of trending movies and TV shows.
- Integrated dynamic APIs to deliver real-time updates on ratings, release dates, and cast information without manual reloads.
- Designed a clean, responsive UI focused on seamless user experience, perfect for film buffs looking for fast and stylish updates.
- Implemented infinite scrolling for effortless content discovery, keeping users engaged without disruptive page loads.

EDUCATION

B.Tech in Information Technology

Gautam Buddh University, Greater Noida (**August 2019 – July 2023**) | **CGPA:** 8.6/10
